
Receptor-only attention map
Self-attention on receptor alone (L=731 residues); log heatmap + profiles (raw maps look similar because attn is local)
Example: FLS2 / flg22 | true=Immunogenic · MAMP-ML pred=Immunogenic
Model: MAMP-ML (fine-tuned) · backbone esm2_t30_150M_UR50D · checkpoint-14.pth · attn_layer=1
Receptor query residue (1…731)
Receptor key residue (1…731)
log10(attn)
Mean incoming attn
Mean off-diagonal incoming
Attention
Receptor residue index
